# Product Identification

Inkjet Printers | Laser Coding | Label Applicators | Print & Apply System | Natural Branding | Shrink Sleevers  
Inkless Coding | Linerless Labellers

**Result Product Identification** offers a comprehensive range of equipment designed specifically for primary branding and regulatory coding. Our solutions cover everything from high-quality labelling and sleeving to advanced coding systems that support full traceability and product authenticity – at the pack, case, and pallet level. Whether you're looking to enhance your brand presence or ensure supply chain integrity, our technologies are built to deliver reliable performance across every stage of packaging.

Overlabelling

**Result's Value Added Packaging** range delivers innovative and sustainable solutions designed to improve functionality, freshness, and consumer convenience. Our offering includes recloseable and resealable options like **Peel & Seal**, providing easy-open and secure closure, and **FreshPack**, developed to extend shelf life and reduce food waste. We also support export and corrective overlabelling and dynamic on pack promotions to enhance product appeal. Aligned with Regional Sustainable Packaging Guidelines, our solutions help brands meet their sustainability targets while standing out on shelf and delivering a better consumer experience.

Time & Temperature Monitoring

**Result Materials** offers one of the industry's most advanced ranges of self-adhesive Label Materials solutions – tailored for both performance and sustainability. Our materials include recyclable, compostable, and **wash-off Label Stocks** that align with global Sustainable Packaging Guidelines. We also provide specialised options for **reclose, reseal, and overlabelling** applications, helping brands deliver consumer convenience and packaging efficiency. Additionally, we supply **RFID** and **NFC** technologies for smarter tracking, and we support **time & temperature monitoring** systems for cold chain assurance. With innovative coating technology, our materials outperform in a broader range of applications, enabling functionality without compromising on sustainability.

# Process Automation

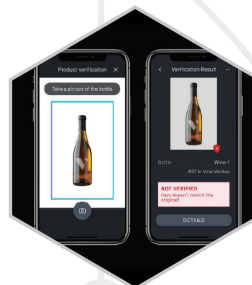

Traceability | Authenticity | Label Design

**Result Process Automation** delivers complete end-to-end control by integrating advanced equipment, industrial automation, and powerful cloud-based software solutions. Through our partnership with **Loftware**, the global leader in enterprise labelling, we offer **centralised label design and management**, enabling consistent, compliant, and efficient labelling across multiple sites and packaging lines.

Our platform supports full **traceability** and **product authenticity** from item to pallet, with real-time visibility and control for brand owner, supply chain and consumer. Combined with intelligent vision systems and automated process monitoring, our solutions help manufacturers streamline operations, meet regulatory standards, and safeguard product integrity at every stage.
