

Adhesive 62P

Specifications

Tack	high	
Peel adhesion	high	
Shear	low	
Minimum application temperature	-10 °C	
Service temperature	-20 °C to +50 °C	

Application and use

The adhesive 62P is designed for applications where the label has to be removed without residue. Good results can be reached from 35 °C.

The washing time depends on the label material, the substrate on which the label is applied, the printing and the washing parameters as water temperature, water pressure and the used washing additives.

The adhesive shows good results on PE and PP reusable boxes and buckets, which are also used at low temperatures.

Storage conditions and shelf life

Storing at a temperature of 20 ± 5 °C, a relative humidity of 45 ± 5 % and a dark storage is recommended.

Moisture, heat and direct sunlight have to be avoided.

The shelf life is 1 year from date of production.
